The ETA encapsulates a suite of cloud computing solutions engineered by Arbo with the objective of autonomously monitoring, extracting, and aggregating transactional postings from a multitude of interstate natural gas electronic bulletin boards.

This report is designed to allow customers to visualize several different aggregations of the previous month's transactional postings, in order to identify trends, anomalies—and ultimately—opportunities.

We currently monitor the electronic bulletin boards of 46 pipelines and collect details on all capacity release and interruptible transactions being awarded. The scope of the report increases as ArbolQ's data engineering team continuously works to add coverage of additional pipelines.

If you have any comments, concerns, or questions regarding this report or related offerings, please contact Corey Brill, Advisory Services Leader: corey@goarbo.com.
